miExcel Payroll

Contents

How to Import Time Into Payroll

Best used for importing departments that have multiple GL account overrides, activities, rate overrides, or jobs in any given pay period. These tend to be Parks and Rec departments and Public Works departments
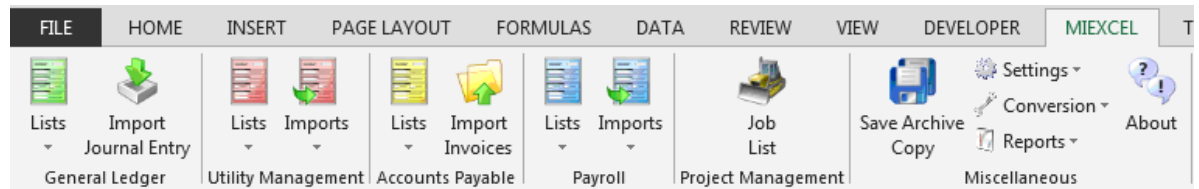

1. Enter the time into a spreadsheet or get an export from your timekeeping system into Excel. An example spreadsheet is included with these materials as well as a screenshot shown below

2. Make sure you have the following fields on each row of your spreadsheet
   a. **Employee Number**
   b. **Pay Code**
   c. **Sub Code**
   d. **Hours, Amount, or Units**
3. Other optional fields that can be included consist of
   a. **Amount** – a flat amount to be paid to an employee
   b. **Description** – the description the particular time line
   c. **GL Account** – overrides the GL account for all time entries on that line
   d. **GL Activity** – override the GL activity for all time entries on that line
   e. **Job Number** – allows you to specify a job for hours on that line
   f. **Rate** – allows you to override the rate for hours on that line
4. Highlight only what you want to import and a header row (if applicable)

5. Open the Import Time Screen
   a. Click the MIEXCEL tab

miExcel Payroll

b. In the Payroll section select **Imports -> Time**

c. The import mapping grid will appear on the right hand side of the grid

    i. If you selected a header row as shown in the example above. Check the box **First Row Contains Headers**. This will change the columns from the column letters to the column names you have specified

Column Mapping

Column	Caselle Element	
total	None	^
ee #	None	
PC	None	
SC	None	
Rate Override	None	
GL Activity Number	None	
GL Activity	None	
GL Account Override	None	
Description	None	

    ii. If you did not select a header row, do NOT check this box or the first row of your import will not be imported

Column Mapping

Column	Caselle Element	
P	None	^
Q	None	
R	None	
S	None	
T	None	
U	None	
V	None	
W	None	
X	None	

d. If you checked the box First Row Contains Headers the   will become available at the bottom of the screen   Auto Map

    i. If you click this button the Caselle Element column will be filled in based on the column headers you have typed in matching the Caselle Element drop down closely. The results for this example are shown below. Note that some columns still need to be mapped as the auto map match was not close enough. This will be done in the next step

Column Mapping

Column 🔎	Caselle Element
total	None
ee #	None
PC	None
SC	None
Rate Override	None
GL Activity Number	None
GL Activity	GL_Activity
GL Account Override	None
Description	Description

e. Map out any remaining columns by selecting the element from the drop down as shown below. For columns you do not want to import select **None**.

Column Mapping

Column	Caselle Element
total	None
ee #	
PC	
SC	
Rate Override	
GL Activity Number	
GL Activity	
GL Account Override	
Description	

Drop down options:
Amount
Description
Employee_Number
GL_Account
GL_Activity
Hours
Job_Number
None
Pay_Code
Rate
Sub_Code
Units

f. The completed import mapping for this example is shown below. You may note that the auto map feature mapped the GL Activity column to GL activity but this is the name of the activity not the number. GL activity should have been mapped from the GL Activity Number column. This is why it is important to always verify your mapping is correct prior to importing

Column Mapping

Column	Caselle Element
total	Hours
ee #	Employee_Number
PC	Pay_Code
SC	Sub_Code
Rate Override	Rate
GL Activity Number	GL_Activity
GL Activity	None
GL Account Override	GL_Account
Description	Description

a. Finally we need to fill out the bottom portion of the screen

     i. The current **Pay Period** should already selected from the drop down. NOTE: If this is the incorrect period, you should go into Clarity and update the pay period prior to proceeding with the import

     ii. Select the **Created Date**. This is just used on the backend to note the day in which you did the import

b. We are ready to import. Click Import Import

     i. Validation will be run automatically and will check for things noted below

       1. Fields that are too long. Eg. Your description is too long

       2. Fields that cannot be parsed. Eg. You enter a word in the total hours column instead of a number

       3. Employee numbers that don't exist

       4. GL accounts and activities that don't exist

       5. Job Numbers that don't exist

       6. Pay Code/Sub Code combinations that don't exist

       7. Pay Code/Sub Codes that don't exist on a specified employee

     ii. If validation errors are found. The errors will appear on a taskpane on the right hand side of the screen and you will receive the message shown below. If you are okay with the errors and would like to proceed with the import Click **Yes**, otherwise click **No** and fix the errors

       1. Clicking on a row in the validation errors taskpane will drill you down right to the area where the error was found

       2. In this case employee number 5 does not have paycode/subcode 05-02 and the paycodes 06-00 and 08-05 do not exist

3. Fix the errors
4. Click **Import** again

iii. If the import is successful, you will see the following message

How to Import Time Table Into Payroll

Best used for importing departments that have relatively simple time and one person is keying all the time into a spreadsheet.

1. Enter the time into a spreadsheet or get an export from your timekeeping system into Excel. An example spreadsheet is included with these materials as well as a screenshot shown below

| ee #	ee name		Regular Pay 01-00	Overtime Pay 02-00	Vacation Pay 03-00	Sick Leave 04-00	Holiday Pay 07-00	total	Rate Override	GL Activity Number	GL Activity	GL Account Override	Description Notes
5	Smith, Jacob S		40.00					40.00	85.00	1	St. Patrick's Day Parade		Holiday Override Rate
5	Smith, Jacob S		40.00	1.0			16.00	57.00			#REF!	10-42-350	Contract Work
10	Rockford, Julie M		30.00					30.00			#REF!		
15	Morris, Sharon		10.00			4.00		14.00			#REF!		
20	Spencer, Annette		15.00	0.50	3.00		8.00	26.50			#REF!		
25	Johnson, Douglas		5.00		1.00	3.00		9.00			#REF!		
30	Austin, George		0.00					-			#REF!		
35	Slade, Randy L		0.00			2.00		2.00			#REF!		
40	Roberts, Dale B				4.00		2.25	6.25			#REF!		
45	Hobson, Maurice							-			#REF!		
50	Gilson, Marvin		52.00					52.00			#REF!		
55	Gordon, Natalie C				6.00			6.00			#REF!		
60	McNeil, Annie							-			#REF!		
65	Curtis, Amber		80.00					80.00			#REF!		
85	Ellison, Ray		10.00					10.00			#REF!		
80	Dickens, Amy		1.00					1.00			#REF!		
100	Watson, Lamont							-			#REF!		
95	Granger, Benjamin R							-			#REF!		
		Total:	283.00	1.50	14.00	9.00	26.25	333.75					

2. Make sure you have the following fields on each row of your spreadsheet
   a. **Employee Number**
   b. **Hours, Amount, or Units** for each applicable pay code/sub code. NOTE: Each column should be a different pay code/sub code combination
3. Other optional fields that can be included consist of
   a. **Description** – the description the particular time line
   b. **GL Account** – overrides the GL account for all time entries on that line
   c. **GL Activity** – override the GL activity for all time entries on that line
   d. **Job Number** – allows you to specify a job for hours on that line
   e. **Rate** – allows you to override the rate for hours on that line
4. Highlight only what you want to import and a header row (if applicable)

ee #	ee name		Regular Pay 01-00	Overtime Pay 02-00	Vacation Pay 03-00	Sick Leave 04-00	Holiday Pay 07-00	total	Rate Override	GL Activity Number	GL Activity	GL Account Override	Description Notes
5	Smith, Jacob S		40.00					40.00	85.00	1	St. Patrick's Day Parade		Holiday Override Rate
5	Smith, Jacob S		40.00	1.0			16.00	57.00			#REF!	10-42-350	Contract Work
10	Rockford, Julie M		30.00					30.00			#REF!		
15	Morris, Sharon		10.00			4.00		14.00			#REF!		
20	Spencer, Annette		15.00	0.50	3.00		8.00	26.50			#REF!		
25	Johnson, Douglas		5.00		1.00	3.00		9.00			#REF!		
30	Austin, George		0.00					-			#REF!		
35	Slade, Randy L		0.00			2.00		2.00			#REF!		
40	Roberts, Dale B				4.00		2.25	6.25			#REF!		
45	Hobson, Maurice							-			#REF!		
50	Gilson, Marvin		52.00					52.00			#REF!		
55	Gordon, Natalie C				6.00			6.00			#REF!		
60	McNeil, Annie							-			#REF!		
65	Curtis, Amber		80.00					80.00			#REF!		
85	Ellison, Ray		10.00					10.00			#REF!		
80	Dickens, Amy		1.00					1.00			#REF!		
100	Watson, Lamont							-			#REF!		
95	Granger, Benjamin R							-			#REF!		
		Total:	283.00	1.50	14.00	9.00	26.25	333.75					

5. Open the Import Time Table Screen Screen
   a. Click the MIEXCEL tab
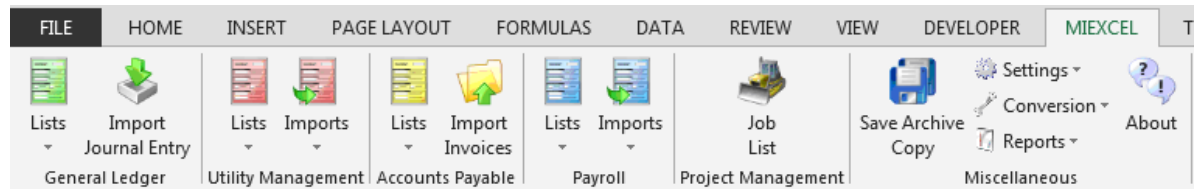

b. In the Payroll section select **Imports -> Time Table**

c. The import mapping grid will appear on the right hand side of the grid

    iii. If you selected a header row as shown in the example above. Check the box **First Row Contains Headers**. This will change the columns from the column letters to the column names you have specified

    iv. If you did not select a header row, do NOT check this box or the first row of your import will not be imported

d. If you checked the box First Row Contains Headers the   will become available at the bottom of the screen

    ii. If you click this button the Caselle Element column will be filled in based on the column headers you have typed in matching the Caselle Element drop down closely. The results for this example are shown below. Note that

some columns still need to be mapped as the auto map match was not close enough. This will be done in the next step

e. Map out any remaining columns by selecting the element from the drop down as shown below. For columns you do not want to import select **None**. **NOTE:** Each of your pay code/sub code combinations will show up in the drop down. Depending on the setup of the pay code/sub code if we be followed by the word Amount, Hours, or Units to indicate the value that should be filled in in that column

f. The completed import mapping for this example is shown below.

Column Mapping

Column	Caselle Element
ee #	Employee_Number
ee name	None
	None
01-00	01-00 Regular Pay Hours
02-00	02-00 Overtime Pay Hours
03-00	03-00 Vacation Pay Hours
04-00	04-00 Sick Leave Hours
07-00	07-00 Holiday Pay Hours
	None
Override	Rate
Number	GL_Activity
	None
Override	GL_Account
Notes	Description

c. Finally we need to fill out the bottom portion of the screen
    i. The current **Pay Period** should already selected from the drop down. NOTE: If this is the incorrect period, you should go into Clarity and update the pay period prior to proceeding with the import
    ii. Select the **Created Date**. This is just used on the backend to note the day in which you did the import
d. We are ready to import. Click Import Import
    i. Validation will be run automatically and will check for things noted below
        1. Fields that are too long. Eg. Your description is too long
        2. Fields that cannot be parsed. Eg. You enter a word in the total hours column instead of a number
        3. Employee numbers that don't exist
        4. GL accounts and activities that don't exist
        5. Job Numbers that don't exist
        6. Pay Code/Sub Codes that don't exist on a specified employee
    ii. If validation errors are found. The errors will appear on a taskpane on the right hand side of the screen and you will receive the message shown below. If you are okay with the errors and would like to proceed with the import Click **Yes**, otherwise click **No** and fix the errors

Are you sure?

Validation errors were found, are you sure you want to continue with the import?

| Yes | No |

        1. Clicking on a row in the validation errors taskpane will drill you down right to the area where the error was found

Validation Errors   ✕ «

How to Import Time Into Timekeeping

Used to import hours into timekeeping. Best used where tracking in the system is needed on a daily basis or time is applied to jobs

1. Enter the time into a spreadsheet or get an export from your timekeeping system into Excel. An example spreadsheet is included with these materials as well as a screenshot shown below

Name:	Rockford, Julie			
Employee Number:	10			
Pay Period Start Date	5/19/2013			
Emp Num	**Date**	**Task**	**Activity**	**Hours**
10	5/20/2013			
10	5/21/2013			
10	5/22/2013			
10	5/23/2013			
10	5/24/2013			
10	5/27/2013			
10	5/28/2013			
10	5/29/2013			
10	5/30/2013			
10	5/31/2013			
	Use the space below to add additional entries			
10

	Total Hours			0

2. Make sure you have the following fields on each row of your spreadsheet
   a. **Employee Number**
   b. **Date**
   c. **Hours**
   d. **Task Number**
   e. **Activity Code**
3. Other optional fields that can be included consist of
   a. **Differential Employee Number** – if working for another employee and gets that employee's pay
   b. **GL Account** – overrides the GL account for all time entries on that line
   c. **GL Activity** – override the GL activity for all time entries on that line
   d. **Job Number** – allows you to specify a job for hours on that line
   e. **Differential Rate** – allows you to override the rate for hours on that line
   f. **Pay Code –** allows you to provide the pay code if not set on the Activity or override it
   g. **Sub Code –** allows you to provide the sub code if not set on the Activity or override it
   h. **Billing Rate** – allows you to override the billing rate
   i. **Comments** – any comments for that line
   j. **Overtime** – if this line is overtime (true or false)
4. Highlight only what you want to import and a header row (if applicable)

Emp Num	Date	Task	Activity	Hours	Task Number	Activity Code
10	4/7/2014	Administration	1 - Regular	5	1	1
10	4/8/2014	Administration	1 - Regular	5	1	1
10	4/9/2014					

5. Open the Import Invoices Screen
    g. Click the MIEXCEL tab
